STOCK & SALES MANAGEMENT
Safiya Abdulkadir Elmi | 240500598

Problem & Solution

Problem

- Small shops often manage stock manually.
- Low-stock items can be missed.
- Calculating sales manually takes time.

Solution

- Count4U is a simple stock and sales management system.
- It helps shop owners keep track of products and stock.
- Sales and stock quantities are updated automatically.

Target Users & Features

Target users

- Spaza-shop owners
- Small retail shops

Features

- User login
- Product catalogue
- Sell items
- Automatic sales total
- Automatic stock deduction
- Stock up/restocking
- Low-stock alerts
- Sales dashboard
- Best-selling and slow-selling products

How it works and technology used

How Count4U Works

- Select product → Add to sale → Checkout → Sale recorded → Stock updated
- For restocking: Select product → Enter quantity → Stock updated

Technology Used

- HTML
- CSS
- Bootstrap
- JavaScript
- PHP
- MySQL

Benefits & Improvements

Benefits

- Saves time
- Reduces manual calculations
- Makes stock easier to monitor
- Shows important sales information
- Simple interface for small-shop owners

Future Improvements

- API integration
- Integration with services such as stock/payment providers

Conclusion

- Count4U provides a simple way to manage stock and sales.
- It reduces manual work for small-shop owners.
- The system keeps important stock and sales information in one place.
